Originally founded as a tenant finish company, Foster Plumbing has expanded its capabilities to provide a diverse range of plumbing services. Performing larger and more extensive scopes of work has created strong working relationships with partnering subcontractors throughout the MEP industry. These focused coordination efforts provide Foster Plumbing the ability to offer owners a more comprehensive and efficient MEP option.	EBE, MWBE, SBE	Amy Carrnrick	303-752-5332	amy@fosterdenver.com

Ayuda Companies	Subcontractor	Construction	Ayuda Companies, founded in 2002, is a premier provider of Environmental Consulting, Environmental Remediation, and Construction Management Services. In 2013, Ayuda began performing site investigations and human health risk assessments related to PFCs [perfluorinated compounds], an emerging contaminant found in fire-fighting foam and other products. This work has proceeded under a USACE contract with direct and close collaboration with the Air Force and the Air Force Civil Engineering Center. On the remediation side of our business, Ayuda began performing MMRP/UXO services in 2014, and continues to perform our traditional remediation services such as soil and groundwater investigation and remediation, hazardous material surveys, and abatement and air monitoring services. Ayuda is a small business under all NAICS codes in all of its business lines and is a Certified HUBZone EDWOSB firm, as well as M/WBE, DBE and SBE with the City and County of Denver. Bridge Diagnostics, Inc	Subcontractor	Construction, Professional Services	Since 1989, BDI has tested, monitored, and evaluated over 500 structures around the world including: steel bridges, pre-stressed concrete bridges, reinforced concrete bridges, timber bridges, slabs, T-beams, multi-girder, and box beams. In order to provide these services in the most efficient manner to our customers, we developed our own electronic testing equipment and specialized analysis software. A very significant attribute of our firm is the application of this in-house field testing equipment. Since we are structural engineers and know what type of responses we want to measure on the bridge, we have been able to develop custom systems to help us record this data in the most efficient way possible. We also manufacture and sell these testing systems to all types of research institutions around the world.	SBE	Victoria Scheber	303-494-3230	trudeea@bditest.com

ChemSolutions LLC			<p>ChemSolutions LLC is an environmental testing laboratory analyzing soil, water and air samples using EPA, RCRA and Standard Methods methodology. We are an accredited laboratory providing reliable data and a high level of service in our base lab in metro Denver or on-site in mobile laboratory. With our mobile environmental laboratory, we provide onsite, real-time testing on Superfund, brownfield, industrial and military sites.</p> <p>ChemSolutions supports vapor-intrusion studies, site investigations and site remediation. We work alongside direct push rigs, traditional drilling rigs and excavation equipment. Our services are designed to optimize field operations by providing laboratory support to guide decisions made in the field. ChemSolutions' base laboratory, performs routine testing on a one-week turnaround time. The laboratory also provides rapid turnaround of sample results. ChemSolutions can perform analyses with a turnaround time measured in hours, not days or weeks.</p>	DBE, EBE, MWBE, SBE	Lisa Graves	303-771-5570	<a href="mailto:lisa@chemmobile.com">lisa@chemmobile.com</a>

Courtney McRickard, Inc			Three Sixty Design is a landscape architecture firm specializing in sustainable urban design for residential and commercial projects. We develop innovative landscaping and ecological strategies for any location and budget. Working in collaboration with our clients, Three Sixty Design wholly analyzes the natural characteristics of a site and responds to each site's unique views, vegetation and topography. Then we create a vivid landscape that will satisfy the most discriminating aesthetic. From conceptual design through final walk-through, our designs are site-specific, sustainable and purposeful. From the outset, Three Sixty Design creates a distinctive image for our clients. We let the details of every site reveal its unique characteristics. Ultimately, we create livable spaces in harmony with nature that make a lasting impression.	DBE, EBE, MWBE, SBE	Courtney McRickard	720-360-0080	courtney@sitedrivendesign.com

Dalco Industries	Subcontractor	Construction	Dalco Industries and Teton Steel are one of the Rocky Mountain West's premier concrete accessory outfits. We are employee-owned, locally-run, and completely dedicated to serving our customers, from the smaller customer looking to complete a driveway, all the way to the huge manager building a super highway. For over 50 years, we've built the region and a lasting relationship with our customers. Our extensive product line includes: rebar, wire mesh, forming ties, couplers, patches, grouts, cures and seals, patches, form release, insulation, void forms, vapor barrier, and waterstop. Our specialty lines include: roof hatches, floor doors, trench drain systems, wire mesh partitions, floor mats, and access doors. Through our relationships with only the world's top manufacturers, we offer our customers the top products at fair market prices. Dufficy & Sons, Inc.			<p>Central Denver Ironworks, Inc (CDI) designs, fabricates &amp; installs all variety of steel products: shelters, structures, ornamental, pedestrian bridges &amp; even sculptures. Our workmanship represents the highest standard of excellence in the industry. The metal structures built by CDI are the product of 3 generations of the Dufficy Family and of more than 50 yrs experience in producing the highest quality work in structural &amp; ornamental steel fabrication. Our policy is to ensure that at all times appropriate industry-accepted fabrication practices &amp; quality control procedures are implemented, which will produce a final product that complies with all applicable product standards and specifications. To support this objective, we have a QC Dept led by a full-time certified welding inspector. We furnish a complete package of materials, including installation, glazing and windscreen systems. We can also provide engineering &amp; design services for signature projects.</p>		Clara Dufficy-La Rosa	303-433-3180	tomdufficy@cdironworks.com

Elite Hauling Services Inc.	Subcontractor	Construction	Construction debris may originate from a building site where something is being built, renovated, or demolished. Roll-off dumpsters are also used for various jobs that need much material to be taken away. The material in the roll-off may be taken to a landfill, recycled or disposed/recovered of in some other way. Elite Roll-off Services has three different sized trucks to handle all container sizes, 10, 15, 20, and 30, cubic yards dumpsters. While the roll-offs may be rented by volume, they have weight limitations. Weight limits may be necessary to ensure compliance with road-use and safety laws and regulations. The maximum weight is specified at the beginning of the job. Containers loaded with more weight than allowed typically result in an overage charge. In cases where the material to be disposed of is especially dense, such as concrete, we have a container with lower sidewalls to use to help reduce the risk of exceeding the weight limit. FAS Systems Group, LLC			FAS Systems Group, LLC provides complete installed fire alarm detection and security system solutions for new construction and end-users. FAS Systems Group is a strategic partner of Edward's EST fire alarm products and certified integrator for top card access and CCTV manufacturers. We also provide radio amplification, mass notification and rescue assistance systems. It is our goal to provide the customer with quality information that will help with the budgeting, planning and engineering of the most cost efficient and code compliant systems. FAS will then provide all necessary products and services from pre-construction planning to final system commissioning for a total turn key solution. FAS 24 hour service department provides the proper maintenance, inspection and testing procedures to insure system integrity for the full life cycle of systems. Gold Label Door Company	Subcontractor	Construction	Why choose us as your Residential / Commercial Door Company? We serve the customer by working around their schedule as much as possible, fixing problems quickly and correctly, resulting in as little down time as possible. We are an extremely easy company to deal with. We can save you money and will become a partner that you count on. We are there for you and all your door needs with extremely low prices and a very high customer service focus. We value our customers and their business. Our main referral base is our customers. Our main objective is to provide customer service that is second to none. We service and replace more than just sectional doors. We also work on roll up doors (overhead coiling), telescoping doors, dock levelers, high speed doors, fire door testing, and all models of operators including gate operators. We also offer Preventive Maintenance agreements so that we keep each door running smoothly.	SBE	Brian Van Meter	303-279-7234	quote@goldlabeldoor.com

Group14 Engineering, PBC	Subcontractor	Construction, Professional Services	Group14 Engineering, Inc. is a consulting firm committed to improving the energy and resource efficiency of buildings and building products. Group14 is a recognized authority in sustainable design and energy efficiency, the evaluation of environmentally-appropriate technologies, building commissioning and energy audits, and LEED project management. We offer a unique combination of in-depth energy modeling and design assistance skills and hands-on commissioning and energy auditing expertise. Group14 performs 75% of its work in Colorado. Having been selected by Xcel Energy to provide energy design assistance in Colorado, we have worked on more than 75 projects locally (many of them LEED) over the past three years. Our Xcel energy design assistance has kept more than 10 MW off the grid – that’s enough to power nearly 10,000 houses for a year.	DBE, MWBE, SBE	Natalie Weber	720-221-1074	lcharlier@group14eng.com

Harmonic Media, Inc.	Subcontractor	Construction	Harmonic Media provides custom large format printing and graphic solutions for businesses of all sizes in Denver, along the Front Range, throughout Colorado, and beyond. We make kicka\$\$ visuals your brand can use to tell your story. Our style is hip and trendy blended with an old school touch of class. As far as we're concerned – the more bizarre a request, the better – we live for a good challenge. But in our collective 50+ years in the business, we've gotten really good at design, printing, fabrication, and installation. We are a multi talented large format printing and graphics agency that prides itself on delivering the highest quality ideas, printed graphics, and fabrication that Denver has to offer. We are professionals, that bring together other professionals, and collaborate our expertise, working together in harmony. This allows us to bring more to the table, be adaptable, and have the resources and know how, which allows us tackle any visual project. Harrison Western Construction Corporation, Inc			When founded in 1968, Harrison Western brought superior design and construction services to the mining industry. A few years later, the firm expanded to offer heavy civil and above-ground construction services. The company has set North American shaft sinking records through major aquifers, and was the first contractor to introduce earth pressure balance technology to the tunneling industry. Today with more than 50 years and over \$2 billion in construction, mine development, and engineering, Harrison Western leads the industry in safety and performance. HEXA, Inc. A McDonald Company			In 1999, Mike McDonald opened McDonald Waterproofing and Restoration in Golden Colorado. Founded on quality, honesty, and friendliness, the company has earned recognition as a top specialty repair concrete contractor in Colorado. In 2020, we changed our name to HEXA™ – A McDonald Company. Our new brand reflects how we work together as a company to bring our decades of expertise and know-how to your projects. The hexagon shape in our logo is one of the strongest structures in nature, known to gain strength under pressure while remaining one of the most efficient shapes with the least waste. Mirroring the intricate shapes that make up a beehive, it also embodies that type of highly-functional team environment. HEXA is the perfect name to represent our cohesive team of highly experienced experts, who have an uncanny knack for solving the toughest challenges and consistently delivering superior quality with high attention to detail.		Craig Falls	303-279-8700	sheenah@hexainc.com

ITS Roads			ITS Roads (ITSR) offers sophisticated technology consulting services spanning the full lifecycle of transportation and information technology (IT) infrastructure and operations. We provide project and program planning, stakeholder engagement, and consensus building support to promote needs-driven development for technology modernization. Our experts draw on decades of experience spanning system requirements, design, development, testing, integration, validation, operation, maintenance, and modernization. ITSR advocates for organic modernization within the public sector, promoting scalable, sustainable innovation that maximizes the value of new investments, extends the lifecycle of legacy equipment, increases compatibility with private sector tools, and minimizes operational risk. Lightfield Enterprises, Inc.	Subcontractor	Construction	Since 1978, Vogel Concrete (now, Lightfield Enterprises) has been the leading concrete company in Fort Collins, Colorado. In 2014, Lightfield Enterprises, Inc. acquired Vogel Concrete. We continue to keep the same great traditions of Vogel alive by providing the same great service all over Fort Collins and the northern front range, whether that be in concrete construction, traffic control, or asphalt paving services. Well known to the City of Fort Collins and many general contractors in the area, we specialize in concrete demolition and replacement, as well as flatwork of various kinds. Lightfield Enterprises also performs traffic control and asphalt patching for all of our projects requiring that component and offer that service to other contractors, municipalities, and governmental entities that need to outsource traffic control as a part of their projects. Lithos Engineering, LLC	Subcontractor	Professional Services	Lithos Engineering was formed with the vision of serving our communities by providing our client's projects with recognizable value through prudent risk evaluations that lead to practical and constructible solutions. Lithos focuses on geological engineering, rehabilitation, geotechnical, tunnel, trenchless, and underground engineering and design services through uniquely tailored approaches that suit our client's needs. Lithos Staff has provided geotechnical engineering and design services for hundreds of projects across the nation. We believe that a collaborative approach including the owner and the design team, from inception to construction is the key to success for our projects. Lithos Staff's national experience brings value to each community's project in the core areas: tunnels, trenchless, geotechnical, geological, geostuctural, and rehabilitation engineering, design, and construction management services. Luchetti Surveying, Inc.	Subcontractor	Construction	Luchetti Surveying, Inc. is a professional land surveying company based in Colorado, formed in 2003, providing surveying services throughout the state. The principal, Steve Luchetti, is a Professional Licensed Surveyor with over 30 years in land and construction surveying. LSI team members have over 150 years combined experience in surveying and work with integrity and precision. Our operation is geared toward heavy highway; road and bridge construction. Our involvement is from the design survey phase through final construction as-built documents at the project completion. LSI renders a highlight technical service, using the latest technological equipment and systems, which allows us to complete the most challenging large construction projects. LSI is experienced in building digital terrain models, from simple over lots, to complex highway systems, drainage and dams. Our support includes implementation of design, from the office to the cab of the machines onsite.		Edie Luchetti	303-841-2568	steve@luchettisurveying.com

Martin/Martin, Inc. Consulting Engineers	Prime, Subcontractor	Construction, Professional Services	Headquartered in Lakewood, Colorado, Martin/Martin is a full-service civil and structural consulting engineering firm with related services in investigative engineering, survey, and construction management. Built on experience and industry leadership cultivated since the 1940s, we provide consulting engineering services to a broad range of clients including building/property owners, contractors, developers, architects, government sector clients, homeowner associations, and manufacturing companies. With seven office locations, Martin/Martin engineers regularly perform work throughout Colorado, across the US, and internationally. We design new buildings, remodels, and additions for education, industrial, commercial, sports and recreation, medical, cultural, residential, and government facilities. Our expertise extends to civil design for site development, drainage and stormwater management, water and wastewater systems, utilities, traffic and transportation, and master planning. New Limits Traffic Control, LLC.	Subcontractor	Construction	New Limits Traffic Control will provide a vast array of traffic control related services from start-to-finish application. New Limits methodology within the organization: Be extremely pro-active in maintaining high safety measures, instituting an ongoing comprehensive quality-control program to provide 100% customer satisfaction. Also, put forward exceptional, personalized service, which are crucial factors in shielding the business's reputation within the industry. We will contend with contractors' and inspectors' concerns with a B2B oriented focus with intent of providing timely resolution, to prevent the loss of the contract. RME Ltd., LLC	Subcontractor	Construction	We pride ourselves, as individuals and as a company, that we are very flexible and diversified. Our services are not limited to being a General Contractor, but we also have day to day operations that include over-lot grading, building excavation and backfill, sub grade prep for paving and hardscapes, over-excavation with the use of structural and/or moisture conditioning, main line water, sewer, and storm pipe, trenching, bedding and backfill for a wide range of the dry utilities. We also offer demolition of buildings, construction of parking lots, streets, curb and gutter, underground utilities, and vegetation. RME also has a concrete department that is capable of footings and foundation walls, slab-on grade concrete floors, multi-level slab on grade pours, exterior flatwork, and curb and gutter. RME also performs all aspects of asphalt paving and maintenance.	DBE, SBE	Sonja Beyers	303-841-0292	ed.stmartin@elitesi.com

Steel Images, Inc			Steel Images Inc. is a manufacture and fabricator of metal product. We fabricate custom steel structures, ornamental iron and steel sculptures. We are on the cutting edge of providing custom processing. We are able to take your designs off of the drawing table and make them a reality. Our NTC Laser and experienced staff combine to develop any special shape or cut you require. Computer programmers can expedite your drawings, utilize your saved DXF file drawings and convert them into our state-of-the-art software CAD program. If multiple parts are involved our operators utilize the nesting capabilities to assure a savings in cost and material waste. The programs are transferred to the laser for a review part. Our skilled operators will begin full production after your approval of the sample part if required. Key Expertise includes service, supply and manufactured products:	DBE, MWBE, SBE	Colleen McGann	303-790-0200	colleen.si@gmail.com

The Tendit Group, LLC			Over the last two decades, Top Gun Pressure Washing has grown to become one of largest pressure washing service companies in Northern Colorado. Top Gun is the only pressure washing company with over twenty custom fitted rigs and forty exceptionally dedicated employees. Top Gun Pressure Washing's professional services will improve the safety, performance and appearance of any residential, commercial or industrial buildings' exterior, including manufacturing environments, prepared surfaces, floors or heavy equipment. We clean up emergency spills of hydraulic fluid, animal fat or oils. Throughout the years our crews have restored high-rise buildings in Denver, cleaned heavy equipment, removed hundreds of graffiti areas, removed efflorescence from concrete and brick, cleaned thousands of store front sidewalks, washed parking garages all over the Front Range of Northern Colorado and Wyoming. Western States Reclamation Inc	Prime, Subcontractor	Construction, Professional Services	Western States Reclamation, Inc. has been involved in the restoration and stewardship of land since 1983 in Colorado and the majority of the Western United States. Since 1983, both owners and employees of Western States have taken great pride in the work they have completed and the client relationships they have built and maintained. One of the major driving factors behind WSRI's success is the diverse scientific, construction and design backgrounds of the company's staff. It is the combination of decades of experience along with client relationships that positions Western States as a leading reclamation contractor and consulting company in the United States.
